

# LOW INTENSITY AIRPORT LIGHTING 1000 SERIES

(120V)

Runway Edge  
Taxiway Edge  
Threshold Lighting  
Heliport Lighting

Manairco low intensity 1000 series lights were designed around and built under the original L-840 specification.

Thousands have been sold and installed throughout the world and are successfully operating in such difficult and remote areas as Alaska's North Slope.

DESIGNED FOR ECONOMICAL AIRPORT LIGHTING

MODEL	LOCATION	WATTAGE	LENS COLOR †
1100	Runway	*	Clear
1200	Threshold	*	Green
1250	Threshold	*	Red/Green
1275	Threshold	*	Green/Clear
1285	Threshold	*	Green/Obsc.
1400	Taxiway	*	Blue
1300	Obstruction	*	Red
1350	Obstruction	*	Red/Clear
1500	Heliport	*	Amber

\* Choose from 15, 25, or 40 watt low intensity bulbs.  
† Other bi-color lenses available.

### THREE TYPES OF MOUNTS

**Type "B"**  
Similar to medium intensity lighting installation. Features enclosed wiring in 16" mounting pole, breakable coupling, and 30" metal stake driven into ground. A most substantial type of mounting.

**Type "O"**  
24" treated wooden stake with break-off groove. FAA approved under original Spec L-840. By driving the treated stake into the ground you determine proper height for your individual wing clearance requirements.

**Type "A"**  
24" rust-resistant tubing which fits into 10" or 12", 1 1/4" water pipe driven into ground. Features easy removal for snow plowing or grass cutting.
