3 MODELS TO CHOOSE FROM

RC-1T5A... FAA approved (L-854)
3 pulse turn on
5 pulse second feature
7 pulse third feature

RC-1T4... 5 pulse turn on
3 pulse second feature

RC-1T2... 5 pulse turn on only

Please specify either:

M255-1... 25 amp Control Relay

M255-2... 40 amp Control Relay

Remote antenna with 50' cable and connectors optional

Installing a receiver/controller provided by Manairco, Inc. at your airport, allows any inbound pilot to your field to activate by simply keying the microphone on the proper VHF frequency. With the FAA approved Model RC-1T5A, a second and third output is available for controlling intensity on series circuits, REIL lights, taxiway lighting, or a variety of other equipment. May be installed in or out-of-doors. All units have 15 min. operation cycle. Box mounted whip antenna is standard, remote antenna with cable is available for indoor mounting. Frequency selection available.
