

Power Line Obstruction Markers

Model WM-1, WM-2, WM-3

- Features:
- Tough long-lasting ABS Plastic
- International Orange
- Highly weather resistant
- Twenty year life expectancy
- Little or no maintenance

Specifications:

Size:

WM-1 20" Diameter

WM-2 12" Diameter

WM-3 30" Diameter

(other sizes available)

Weight: 6 lbs

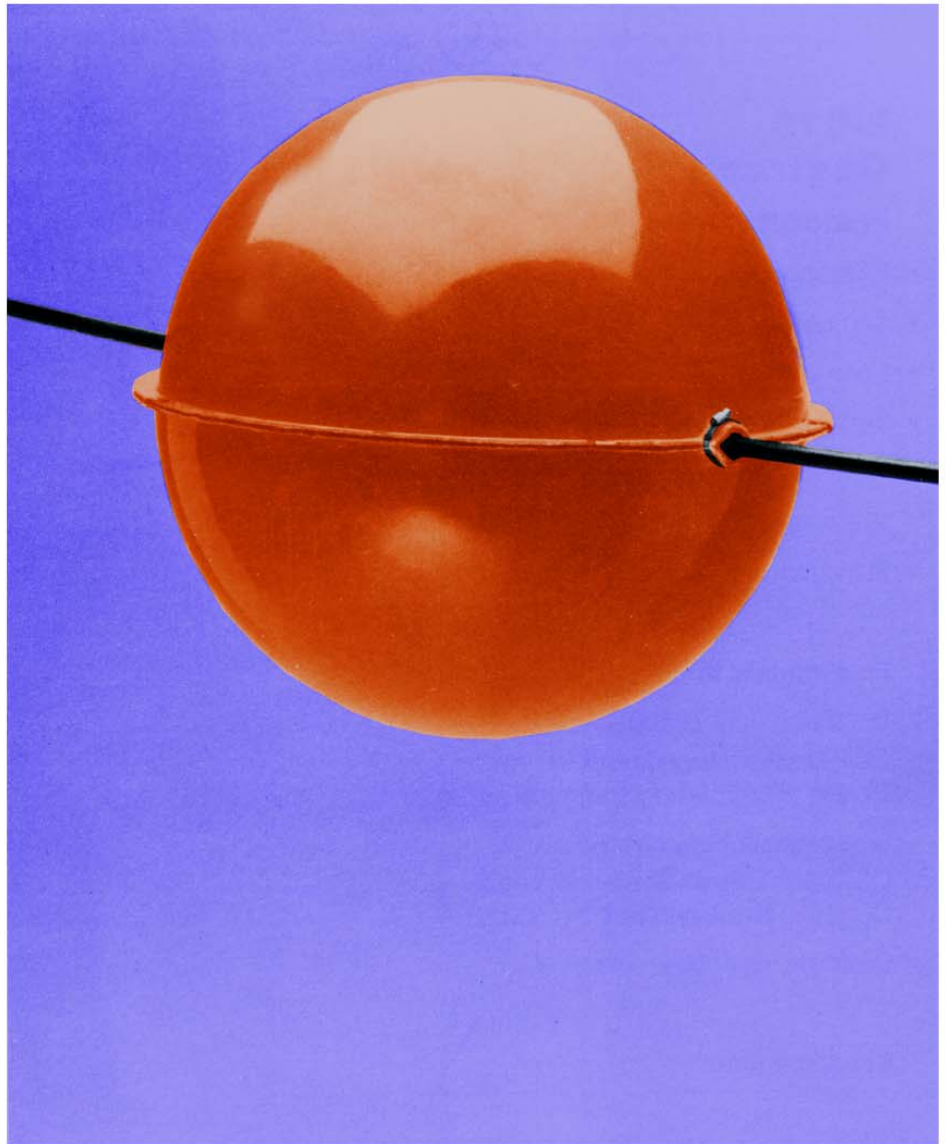

Wire Range: .2" to 1"

Color: International Orange

Construction: ABS Plastic

Design: 2-Half Balls

Life Expectancy: 20 Years

Help reduce power line collisions

Manairco wire markers help eliminate mid-air collisions with unmarked power line obstructions in runway approach paths. Markers have been approved by major power companies for minimal oscillation, chafing, electrolysis, and corona effect to 300,000 volts.

Manairco wire markers will generally be attached free of charge by power companies. They install easily on wire sizes from .2 inch to 1 inch. Necessary hardware and detailed instructions are furnished with each unit.
